Kalamazoo, MI 49008

The new 81,000 square foot Gull Road Criminal Justice Complex on Gull Road was completed in February 2016.

The stunning glass front elevation is made with over 400 panes of glass and the building interior features extensive casework, porcelain tile and carpet flooring. The Court House is equipped with state of the art security, including CCTV, card access, intercoms and 2 way communication systems. It is connected to the Juvenile Detention Center with an enclosed walkway for easy access.

Due to the steeply graded site, AVB used cast-in-place concrete and gravel pier sub-grade improvements to ensure the building was firmly in place. The new Justice Complex is also highly energy efficient. It features LED lighting equipped with occupancy sensors and timers to reduce energy consumption, high-efficiency HVAC systems and 990,000 pounds of recycled content asphalt.
