Owner
Jon Durham

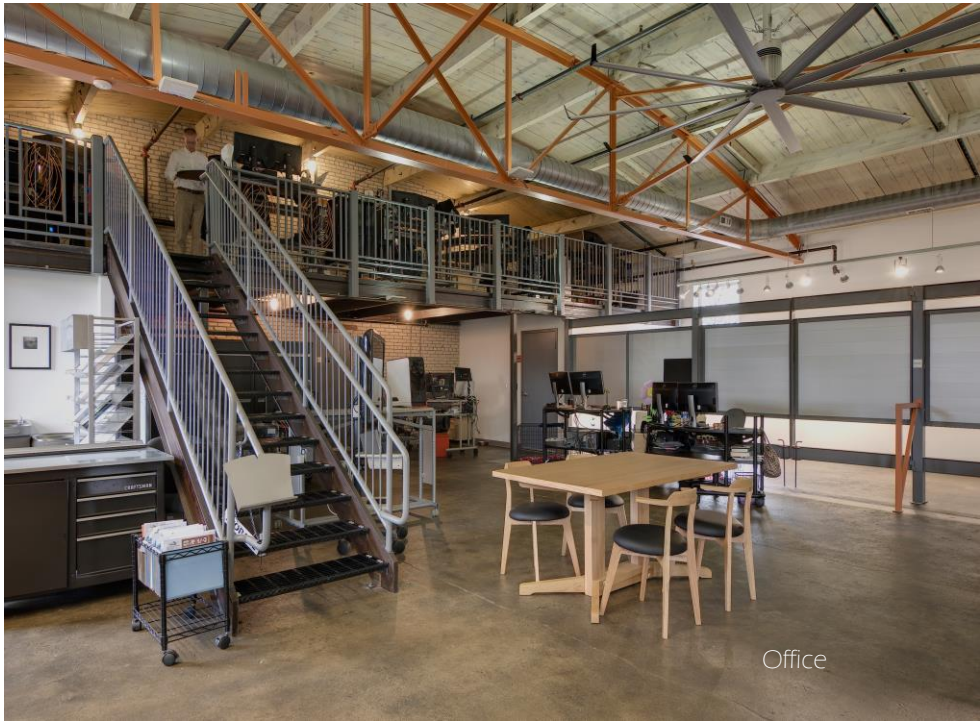

Architect
Bosch Architecture

The Ignertia Building was an adaptive reuse brownfield redevelopment project renovating 12,000+ square feet of a former 1930s factory and metal arts center in downtown Kalamazoo. The creative collaboration resulted in the creation of two offices, an art gallery, two condominiums, and four apartments.

The Ignertia Building is among several businesses that are taking advantage of revitalizing abandoned buildings through Brownfield tax incentives.
