72,000 SF

Use Type  
New Construction

Owner  
Portage Public Schools

Architect  
TMP Associates, Inc.  
259 E Michigan Ave, Kalamazoo,  
MI 49007

This ground-up new construction two-story elementary school project features a multi-use cafeteria and performance space; integrated technology in each classroom; and a state-of-the-art fire suppression system for the safety of the building's occupants.

Although this was a new-construction building, it was located on the existing elementary school grounds and construction occurred on an open-campus during the school term. Precaution was taken to ensure safety of students and staff utilizing the existing building while permitting both construction traffic and school traffic to continue uninhibited.

BUILD SOMETHING BETTER.
